# Durable. Economical. Sustainable.

Find out more: [dibellainfo.com/](http://dibellainfo.com/)  
Click here!

We offer two distinct product lines:

## Good Textiles

Ultimate sustainability in our premium collection.

## Longlife Textiles

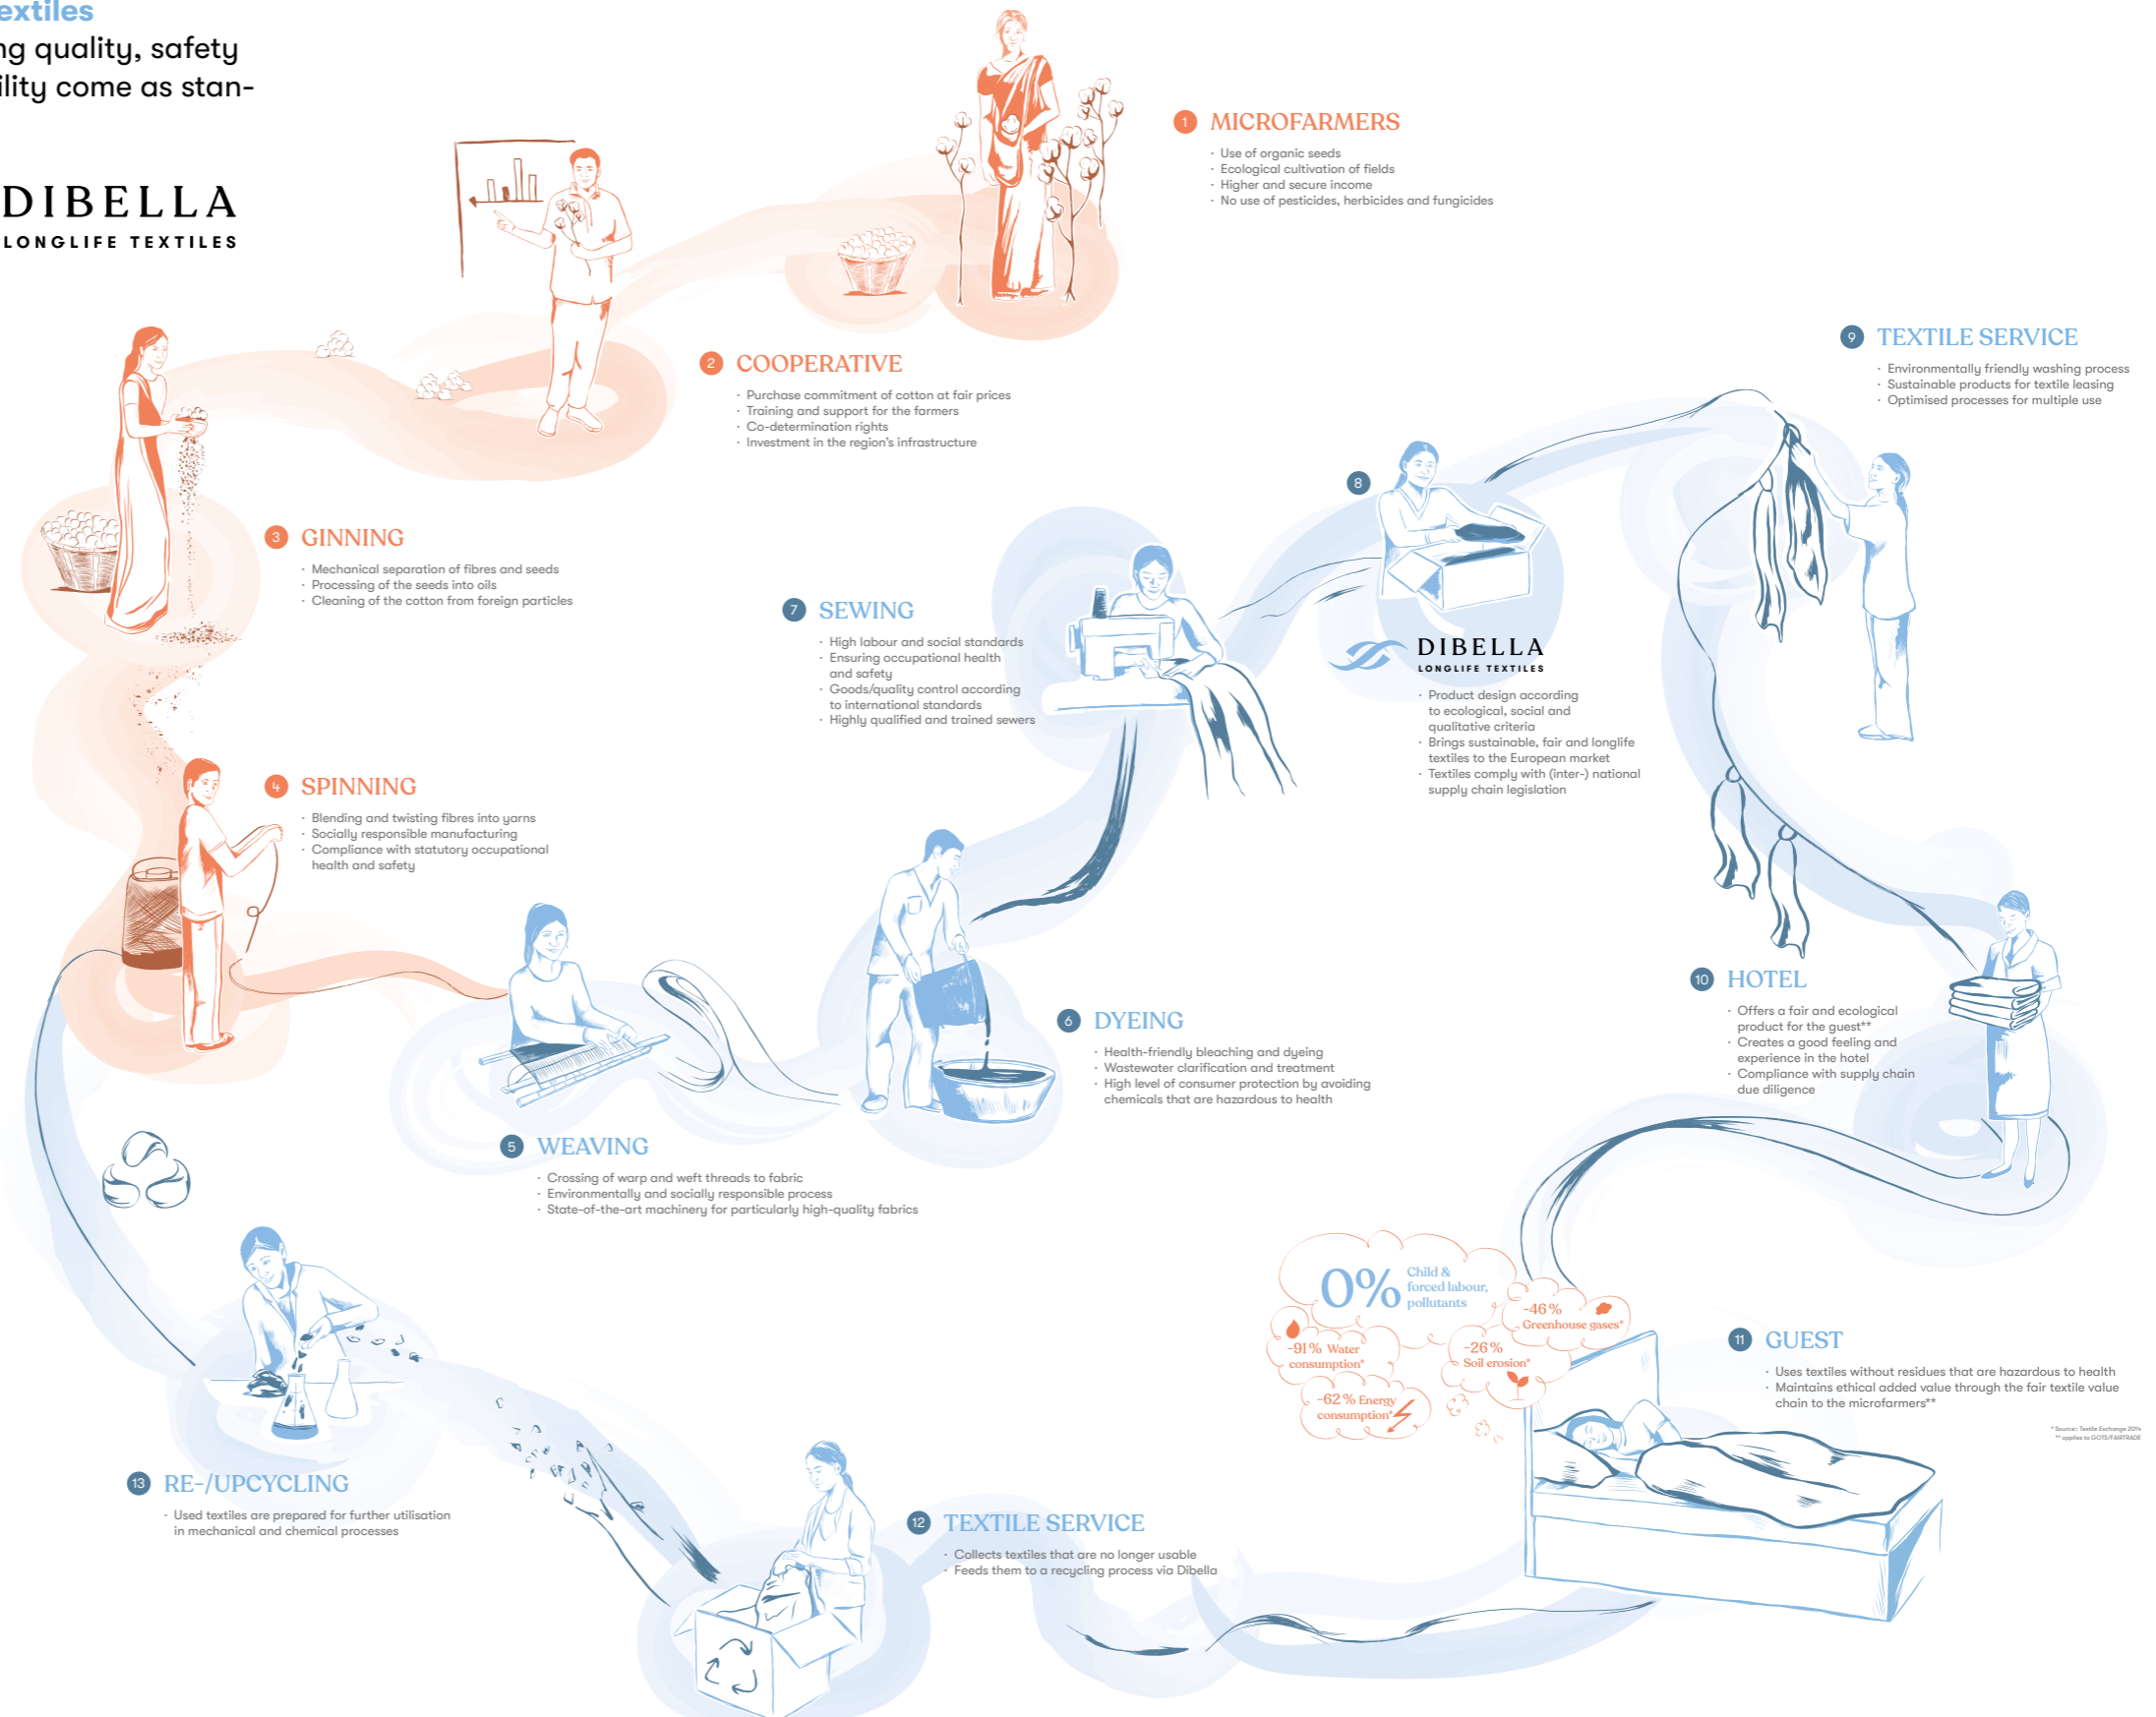

Outstanding quality, safety and durability come as standard.

For our organic Fairtrade goods (which covers the entire supply chain), we source the cotton from the Chetna co-operative in India. This sustainably and fairly grown cotton is processed locally in GOTS-Fairtrade certified companies – this results in the highest possible sustainability standard ever.

OEKO-TEX® MADE IN GREEN guarantees the best social and ecological standards from the weaving mill (shown in blue) and is the cornerstone of the Dibella assortment range. In addition, OEKO-TEX® MADE IN GREEN forms the basis for the GREEN BUTTON state seal.

## Bed linen

- Zero Pre-wash** > No separate pre-wash necessary
- Easy Ironing** > Efficient ironing results
- Low Shrinkage Effect** > Reduced shrinkage
- Easy Identification** > Identification by attaching latest chip technology
- Brilliant White** > Stable high whiteness

8-cm-checked satin

# Bed linen with TENCEL™ Lyocell fibres

60% TENCEL™ Lyocell, 40% cotton

mercerised, white

TC 260, 150 g/m<sup>2</sup>

Virginia  
plain satin

Lyocell – also known as **TENCEL™** – is a so-called "manmade cellulose fibre", i.e. a fibre industrially produced from natural raw materials. It is made from wood from forestry and is completely degradable in soil, compost and also in freshwater and seawater.

### Botanical origin

TENCEL™ Lyocell and modal fibers come from the renewable raw material wood – from natural forests and sustainably managed plantations. The wood and the pulp used by the Lenzing Group come from certified and controlled sources.

Measurements and hand assessments show that TENCEL™ modal fibers are twice as soft as cotton. The softness of TENCEL™ modal fibers lasts longer and withstands repeated washing and drying compared to cotton.

### Sustainable production of TENCEL™ Lyocell fibers

TENCEL™ Lyocell fibers have made a name for themselves because of the environmentally conscious closed-loop manufacturing process that converts pulp into cellulose fibers with high resource efficiency and low environmental impact. This solvent spinning process recycles the process water and returns more than 99% of the solvent to the production cycle.

*This product contains TENCEL™ Lyocell fibres.  
TENCEL™ is a trademark of Lenzing AG.*
